

Simplifying Trials. Accelerating Cures.

FACT SHEET

InoRx Investigator-Led Site Network

Elevating Investigators. Strengthening Clinical Infrastructure. Expanding Research Access.

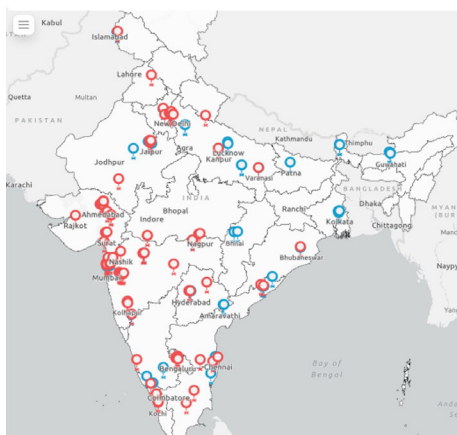

About InoRx

InoRx is a Contract Research Organization built from clinical research execution within SRM Hospitals. That embedded foundation within an integrated healthcare and academic system drives

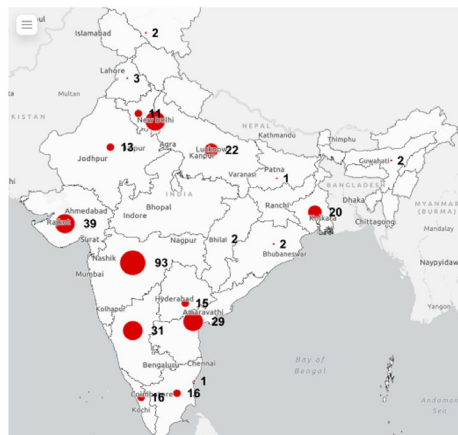

our disciplined, investigator-first approach to compliance and operational excellence.

InoRx was created to bridge the gap between sponsors and investigators by building structured, transparent, and long-term partnerships.

Why Join the InoRx Investigator-Led Network

For Physicians

- A clear pathway to becoming a recognized clinical investigator
- Access to national and international study opportunities
- Professional visibility within sponsor and CRO networks
- Structured operational guidance for research participation
- Access to innovative therapies for eligible patients

For Hospitals and Clinics

- Support in building compliant research infrastructure
- Defined operational processes and readiness frameworks
- Improved selection potential for sponsor studies
- Strengthened institutional reputation

For Experienced Research Investigators

- Access to additional sponsor pipelines
- Long-term collaboration rather than transactional study placement
- Operational partnership grounded in site experience

Our Collaborative Engagement Model

- Initial Engagement
- Expression of interest and introductory discussion
- Understanding clinical expertise, patient population, and readiness

Capability Assessment

- Review of investigator qualifications
- Therapeutic area experience
- Staffing structure
- Infrastructure and space
- Ethics Committee and regulatory status
- GCP training and SOP availability

Study Matching and Activation

- Transparent feasibility discussions
- Clear budget and operational alignment
- Defined communication channels
- Structured startup guidance

Ongoing Partnership

- Repeat study opportunities
- Performance-based engagement
- Continuous capability strengthening

Therapeutic Areas of Focus

- Endocrinology and Diabetes
- Cardiology
- Oncology
- Neurology
- Infectious Diseases
- Vaccines
- Additional areas aligned with sponsor demand

Study allocation is based on investigator expertise and patient population access.

What We Expect From Partners

- Commitment to ethical, patient-centered research
- Transparent communication
- Timely feasibility participation
- Alignment with defined operational standards

InoRx's Commitment to You

- Respect for your clinical responsibilities
- Realistic recruitment planning
- Fair and objective selection practices
- Continuous communication
- Long-term partnership mindset

Learn more about joining the InoRx Investigator-Led Network

Clinical research should be structured, transparent, and achievable. With the right partnership and support, it becomes a powerful extension of your clinical mission.

If you are interested in exploring collaboration

- Submit your expression of interest
- Participate in an introductory discussion
- Begin building your research capability with InoRx
